

AMENDMENTS TO THE CLAIMS

Claim 1. (Currently Amended) A detergent composition comprising an aluminosilicate builder and an anionic surfactant and comprising (n) components (i), n being at least 2, whereby the level of aluminosilicate builder in said components together is at least 5% by weight of the composition and the level of the anionic surfactant in said components together is at least 5% by weight of the composition, and whereby the degree of mixture (M) of the anionic surfactant and the aluminosilicate builder is from 0 to 0.7, M being

$$\sum_{i=1}^n \sqrt{(\sigma_i \cdot \zeta_i)}$$

σ is the fraction of the anionic surfactant of the composition comprised in component (i);

ζ is the fraction of the aluminosilicate of the composition comprised in component (i) and wherein said aluminosilicate builder is in crystalline form and wherein said composition is phosphate-free, free of amorphous silicate, and substantially free of spray-on nonionic alkoxylated alcohol surfactants and further wherein at least one component is made by a spray-drying process and at least one component is made by an agglomeration process and wherein said component is a mixture of ingredients and each component represents a discrete part of the overall detergent composition.

Claim 2. (Previously Amended) A detergent composition according to claim 1 wherein M is from 0 to 0.65.

Claim 3. (Previously Amended) A detergent composition according to claim 1, wherein the components are particles having a weight average particle size of more than 150 microns.

Claim 4. (Currently Amended) A detergent composition according to claim 1, wherein said anionic surfactant comprises an alkyl sulphonate ~~surfactants~~ surfactant or an alkylsulphate surfactant, or mixtures thereof.

Claim 5. (Previously Amended) A detergent composition according to claim 1 comprising at least 10% by weight of aluminosilicate builder, whereby part of the aluminosilicate is not comprised in the components.

Claim 6. (Previously Amended) A detergent composition according to claim 1 wherein the components are free of sprayed-on nonionic alkoxylated alcohol surfactants.

Claim 7. (Previously Amended) A composition according to claim 1 wherein an effervescant

system is present.

Claim 8. (Previously Amended) A composition according to claim 1 in granular form or in the form of a tablet.

Claim 9. A composition according to claim 1 comprising a hydrogen peroxide source and a bleach activator.

Claim 10. (Cancelled)
